

EURO BIO HIGH TECH

21-22
SEPTEMBER 2017
TRIESTE - ITALY

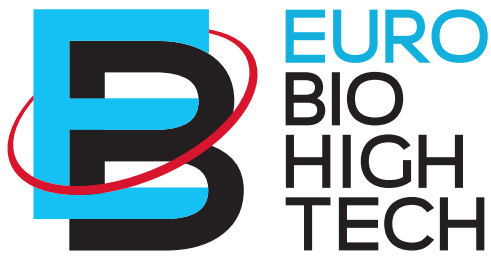

Smart Health: research
for business innovation

www.eurobiohightech.it

Organizers:

Smart Health: research for business innovation

The first-ever showcase devoted to innovation in the biomedical sector, biotechnology and bioinformatics in the Central and Eastern Europe and Balkan areas.

Goals

This unique exhibition has multiple goals:

Innovating thus favouring ongoing search for cutting-edge solutions in the field of healthcare.

Connecting the sector of Bio High Tech innovative enterprises with Universities, Research Centres, Integrated University Healthcare structures, Health and Social services Systems, financial institutions and training and communication bodies operating in the field of Health in order to create new business opportunities.

Promoting the collaboration between Research and Health and Social services systems of the Central and Eastern Europe and Balkan areas, in order to develop research projects in the sector of crossborder medical science.

Becoming an annual event at which regional and national institutions and those from the Central and Eastern Europe and Balkan areas, can meet, share and discover new applications, technologies and processes, also linked to digital innovation, in order improve the performance of their Health and Social services Systems.

Why Trieste?

Trieste lies at the heart of the largest concentration, at national and international level, of operators in the biotech sector:

- **because since 1964 it attracts, promotes, creates and hosts the widest number of national and international institutions, which are main sector players:** the International Centre for Theoretical Physics (ICTP), now the Abdus Salam International Centre; the International School for Advanced Studies (SISSA); the AREA Science Park; the International Centre for Genetic Engineering and Biotechnology (ICGEB), with branch locations also in New Delhi and Cape Town; the CBM - Molecular Biomedicine District of the Friuli Venezia Giulia region, managing body of the Cluster Smart Health FVG; the Academy of Sciences for the Developing World (TWAS); the Immaginario Scientifico Laboratory now called Scienza Centre Immaginario Scientifico; FIT "Fondazione Internazionale Trieste"; ELETTRA Sincrotrone Trieste, I.R.C.C.S Burlo Garofolo; University of Trieste.
- **because it hosts the headquarters of the Cluster Smart Health**, which can rely on a favourable ecosystem in the Friuli Venezia Giulia region, comprising over 150 companies working in the biomedical, biotechnology and bioinformatics fields, boasting overall annual sales of over 800 million Euro and more than 5.000 employed worker, and which has already organized, in collaboration the the business network BioHighTech NET, two successful editions of the BioHighTech Companies Day in 2015 and 2016.
- **because, owing to its privileged geographic location and strategic, political and economic position**, the city favours direct contact with Central and Eastern European countries, with which Trieste keeps long standing fruitful institutional and economic relations, and which have allowed the city, over the past few years, to act as a bridge towards Western Europe and the European Union.

Trieste will in fact be **European Science Capital in 2020 (ESOF 2020)**, where science to business innovation themes will be developed, such as Smart Health.

Globally, Bio High Tech and pharmaceutical industries are facing a series of new challenges brought about by market and R&D dynamics.

Euro Bio High Tech provides an answer to these challenges, by showcasing and fostering debate with regard to research and development projects implemented by companies with Research Centres.

Why Euro Bio High Tech?

Within the context of sector related events, Euro Bio High Tech's distinctive features are:

UNIQUENESS

Presenting a concentration of territorial centres of excellence in the Bio High Tech field that is truly unique in the world.

CROSS-DISCIPLINARY NATURE

Showcasing in an integrated and synergic way, BioHighTech companies working in the fields of biomedical technologies (BioMed), biotechnologies (BioTech) and bioinformatics (BioICT).

COMPLETENESS

Featuring and comparing all components of the Health sector production chain: research, development, production, finance and communication.

How the event is structured

The event offers a comprehensive overview of the Bio High Tech sector, concentrated over two days of exhibitions, meetings and workshops.

- **Exhibition area** devoted to companies, where they can present their research projects, innovations and products
- **Match-making area** and scheduled one-to-one meetings
- **Conferences, Seminars and Workshops area** also featuring projects of the technological transfer departments and the scientific committees from research centres, universities, state-run and private providers of healthcare and social services.

Exhibitors

- **High-tech companies** specialising in:
Biomedical engineering, in-vivo diagnostics
In-vitro diagnostics
Medical informatics and bioinformatics
Innovative therapy
AAL - Ambient Assisted Living
- **Universities and Research Institutes**
- **Integrated University Healthcare structures**
- **Analysis and diagnostics laboratories (health, agri-food industry and environmental)**
- **Health and Social services bodies**

Visitors

- **Technological transfer departments from Universities and Research Centres**
- **Buyers & procurement departments from biomedical, biotechnology, pharmaceutical and ICT companies**
- **Purchase departments:** analysis laboratories that operate independently or in the framework of an agreement with the National Healthcare Service; wholesalers and distributors of medical devices and analysis equipment; healthcare technicians working in biomedical laboratories; local health authorities; residential care institutions; EGAS: Authority for the centralised management of shared services
- **Rehabilitation centres, nursing homes, private hospitals**
- **Companies dealing with cosmetics and food supplements**
- **Investors; life insurers, banks and private banking**
- **Doctors, biologists, pharmacists, biomedical and clinical engineers, biotechnicians, physicists, researchers and entrepreneurs**
- **Reporters and communication agencies**

The exhibition venue

Surrounded by the sea along its three sides and located just a few steps away from the main square (Piazza Unità d'Italia), it provides visibility and prestige for all exhibitions and events, guaranteeing easy accessibility by visitors, who can reach it by foot from many central hotels and is provided with its own parking lot.

The exhibition areas, adjacent to the workshop and conference rooms, will feature booths and meeting areas guaranteeing the utmost privacy for operators during the course of their meetings.
